○Period covered by this Report

Fiscal year 2015: April 1, 2014 to March 31, 2015

○Scope of this Report

This Report covers environmental conservation activities implemented by ROHM Head Office, ROHM Yokohama Technology Center, and 16 ROHM Group Affiliates: 8 domestic affiliates including 3 LAPIS Semiconductor Group companies and 8 overseas affiliates.

RMT that shut down due to the 2011 Thailand floods is not included in the data aggregation for the period of fiscal 2011 to fiscal 2014.

YTC and LAPIS Semiconductor Co., Ltd. have become subject to this Report since fiscal 2014.

AGLED, SciCrystal, and Kionix are not included in the data aggregation at present, but it is being considered to include these companies in the data aggregation in the future.

○Abbreviated names for the Overseas Affiliates

For the purposes of this Report, the names of the Overseas Affiliates are abbreviated as follows:

YTC:	ROHM Yokohama Technology Center	(Japan)
REPI:	ROHM Electronics Philippines, Inc.	(Philippines)
RIST:	ROHM Integrated Systems (Thailand) Co.,Ltd.	(Thailand)
RSC:	ROHM Semiconductor (China) Co.,Ltd.	(China)
REDA:	ROHM Electronics Dalian Co.,Ltd.	(China)
RWEM:	ROHM-Wako Electronics (Malaysia) Sdn.Bhd.	(Malaysia)
RMPI:	ROHM Mechatech Philippines, Inc.	(Philippines)
RMT:	ROHM Mechatech (Thailand) Co.,Ltd.	(Thailand)

Environmental Policy

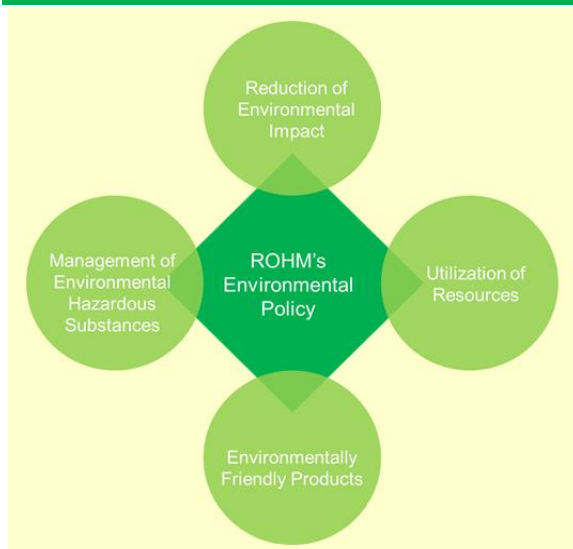

ROHM's Environmental Policy

We will always consider the global environment and contribute to the healthy continuation of humankind as well as to long-term business prosperity

1. Use originality and ingenuity to achieve energy conservation in all corporate activities.
2. Develop eco-friendly products and strive to minimize environmental load throughout the product's life cycle.
3. Prioritize reducing the environmental load when purchasing materials, secondary materials, and products.
4. Comply with domestic and international environmental laws and regulations and regional conventions.
5. Encourage employees to consider the living and global environment and educate relevant individuals.
6. Form a healthy relationship with society by contributing to

ROHM established an Environmental Policy applicable to the entire ROHM Group on October 20, 1997 pursuant to the provisions in the International Environmental Standards ISO 14001. Furthermore, in response to the 2004 revision of ISO 14001, ROHM made a complete revision to the Environmental Policy on April 1, 2006 to provide even more concise, clearer, and more exact descriptions.

ROHM's Approaches toward Global Environmental Conservation

ROHM has been working on a variety of environmental conservation activities centering on the Environmental Policy.

We believe that corporate activities contributing to the environment are to manufacture environmentally friendly products and yet to reduce our own environmental impact in manufacturing them. Particularly for the prevention of global warming, we are active in a range of the reduction of CO₂ and other greenhouse gases emitted from our business operations.

In addition, we will define long-term environmental targets and policy from the perspective of biodiversity, and have approaches to realize sustainable society.

Environmental Objectives

○Response to Legal Requirements

We shall certainly comply with environmental laws and requirements relating to all business activities and voluntarily promote to reduce the environmental impacts.

○Objectives and Targets of Voluntary Activities

1. CO₂ countermeasures in each site

[Policy] Work to stop global warming through overall energy conservation and the reduction of global greenhouse gas emission.

[Objectives] (1) Reduce CO₂ emission by 25% in FY2020 from the actual results of FY2005.

(2) Reduce CO₂ emission (per production unit) by 50% in FY2020 from the actual results of FY1990.

(3) Reduce global greenhouse gas emission (PFC's SF6, etc) by 50% in FY2020 from the actual results of FY1995.

2. CO₂ countermeasures through value chain

[Policy] The scientific techniques and various kinds of calculation tools including LCA are utilized, and CO₂ reduction activities are promoted.

Development of the environmentally-conscious products in alignment with 'NEXT50' is led, and it contributes to the CO₂ reduction at the time of use.

[Objectives] (1) Reduce CO₂ emission through the value chain by 10% in FY2020 from the actual results of FY2010.

(2) Increase the ratio of environmentally-conscious products that account for in sales profits to 100% by FY2020.

3. Reduction of environmental impact

[Policy] Reduce the amount of materials discharged to the air and water, and strive to preserve the Global environment.

[Objectives] (1) Reduce the amount of handling volume of PRTR substances (per production unit) by 10% in FY2020 from the actual results of FY2010.

(2) Reduce VOC emission by 40% by FY2020 from the actual results of FY2000.

4. Effective use of resources

[Policy] Strive for the effective use of valuable resources and the protection of water resources that are fundamental to environmental biodiversity.

[Objectives] (1) Maintain zero emission in domestic group consolidated and reduce waste generation(per production unit) by 40% by FY2020 from the actual results of FY2000.

(2) Reduce waste generation(per production unit) in overseas group consolidated by 60% by FY2020 from the actual results of FY2000.

(3) Reduce water input volume by 10% in FY2020 from the actual results of FY2009.

(4) Increase the usage ratio of the eco-reel (reduced, compact reel)

Outline of ROHM's Environmental Conservation Activities

Targets and Results based on Environmental Policy

The ROHM Group defines targets and approaches based on the environmental policy and objectives to formulate an action plan each year toward the accomplishments of the targets and approaches and promote positive activities.

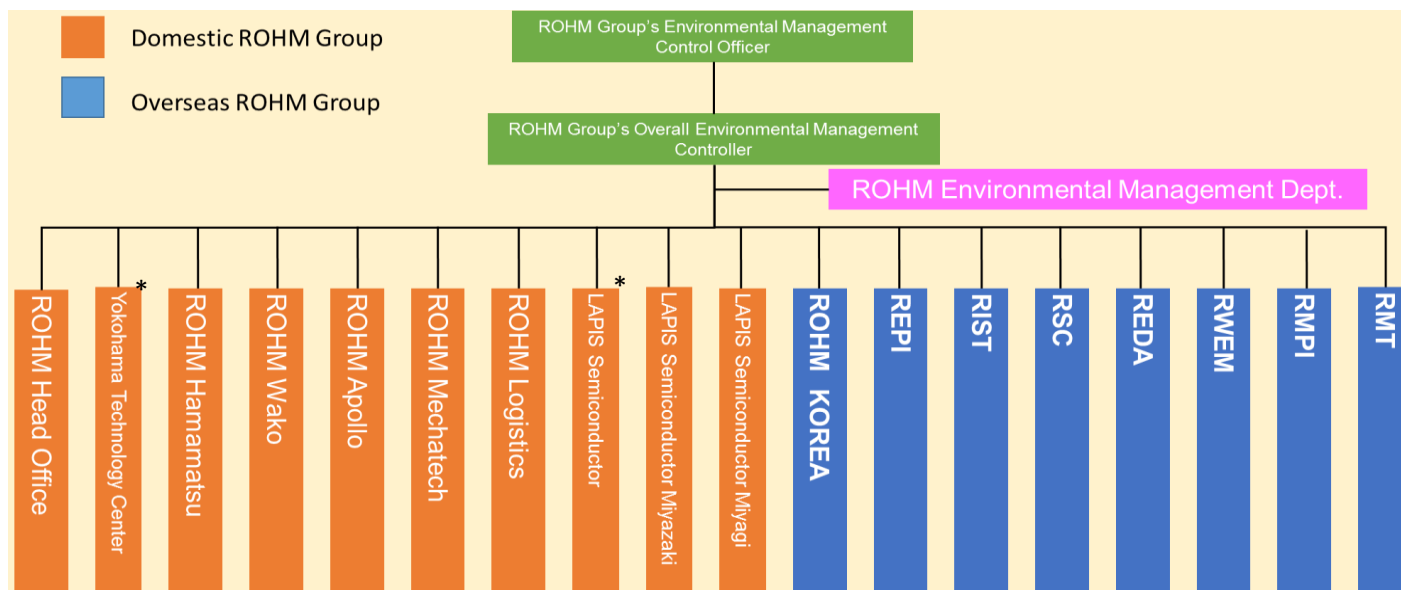

[Targets and Results in Fiscal Year 2014]

Targets in Fiscal Year 2014	Results in Fiscal Year 2014	Evaluation
[CO2 reduction measures at bases]		
① Reduce CO2 emissions by 1% from the predicted value based on the 2014 production volume. ② Reduce CO2 emissions per unit by 1% from the 2013 level ③ Reduce greenhouse gas (i.e. PFCs, SF6) emissions by 1% from the predicted value based on the 2014 production volume	① CO2 emissions were reduced by 1.5% from the predicted value based on the 2014 production volume ② CO2 emissions per unit production were reduced by 6.0% from the 2013 level ③ Greenhouse gas (i.e. PFCs, SF6) emissions were reduced by 1.2% from the predicted value based on the 2014 production volume	☆☆☆
[CO2 reduction measures through value chains]		
① Formulate a model to calculate greenhouse gas emissions based on the GHG Protocol Scope 3, and disclose the emissions. ② Increase the ratio of eco-friendly products that comprise sales profits to 60%	① Calculate and disclose the greenhouse gas emissions based on the GHG Protocol Scope 3, 6 Category. ② Increased the ratio of eco-friendly products that comprise sales profits to 62.9%	☆☆☆
[Reduction of environmental impact]		
① Maintain the 2013 results of PRTR substances handled per unit. ② Reduce VOC emissions by 1% from the value predicted based on the 2014 production volume.	① Reduced the PRTR substances handled per unit by 6.5% from the 2013 level ② Decreased VOC emissions by 16.2% from value predicted based on the 2014 production volume	☆☆☆
[Effective utilization of resources]		
① Maintain zero emissions at domestic consolidation and the 2013 results of waste volume (per unit production) handled per unit. ② Maintain the 2013 results of the volume of consolidated waste overseas (per unit production) . ③ Reduce water consumption by 1% from the value predicted based on the 2014 production volume. ④ Raise the proportion of use of Eco reels (volume- and weight-reduced reels) to that for packaging reels to 40% by the end of 2014.	① Zero emissions were maintained at all domestic companies Waste emissions per unit was reduced by 8.7% from the 2013 level ② Waste emissions per unit at overseas companies was reduced by 6.3% from the 2013 level ③ Water consumption was reduced by 6.5% from the the value predicted based on the 2014 production volume ④ Raised the proportion of use of Eco reels (volume- and weight-reduced reels) to that for packaging reels to 36.7%	☆☆

Outline of ROHM's Environmental Conservation

Environmental Management System

ROHM Group's Environmental Management Promotion System

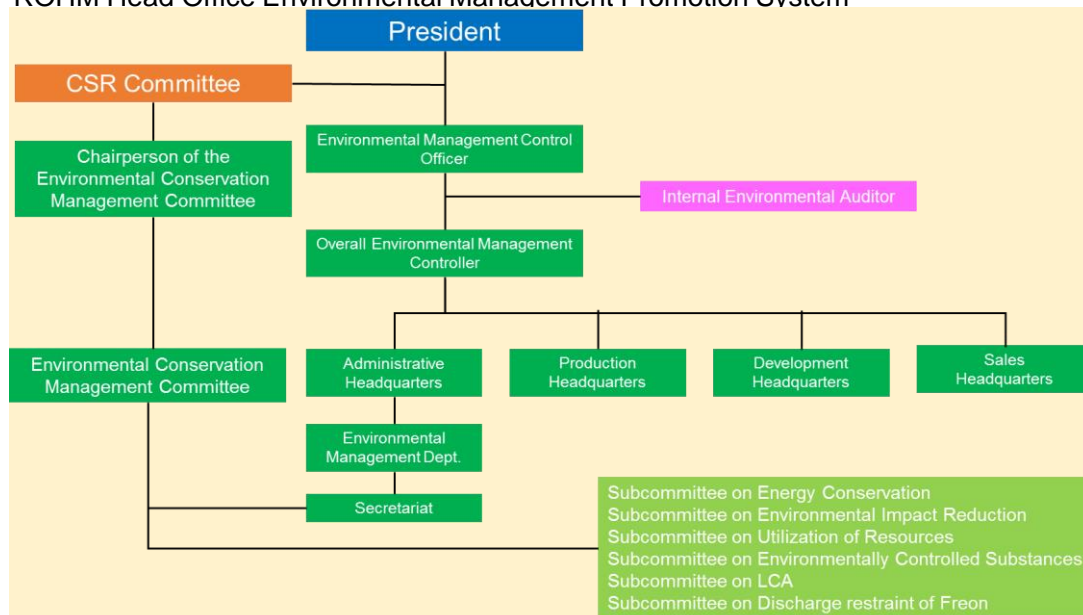

ROHM has deployed across the ROHM Group an environmental management system designed to be shared among the Group on the basis of the International Environmental Standard ISO 14001 and all employees have been working on continual environment improvements.

To promote environmental activity more, YTC and LAPIS Semiconductor Co., Ltd. acquired the ISO14001 certification in FY2014.

Furthermore, the ROHM Group has been implementing constant environmental activities from a global

ROHM Head Office Environmental Management Promotion System

ROHM started the environmental management promotion system in its Head Office in 1990 mainly to conduct pollution prevention activities, and rebuilt it afterward to a promotion system taking environmental conservation with a view to the global environment as a principle behind its activities. In this rebuilt promotion system, the "Environmental Conservation Measures Committee" that deliberates significant policies and measures relating to the environmental activities, and six Subcommittees that comprise the Committee are playing an important role in the promotion system. The Subcommittees are composed of experts in the relevant field, engineers, and related national qualification holders, and the chairpersons of the Subcommittee serve as members of the Environmental Conservation Measures Committee. The Management Committee and Subcommittees meetings are held on a monthly basis.

Changes in Emissions of Environmentally Hazardous Substances

Changes in CO₂ Emissions

Changes in CO₂ emissions from the ROHM Group

ROHM has been pushing ahead with and boosting the shift of downstream process overseas due to the globalization of production bases. This resulted in the reduction of CO₂ emissions from domestic bases by 34% in fiscal year 2014 compared to fiscal year 2005.

Furthermore, the basic unit for CO₂ emissions with respect to real output reduced by 56% in fiscal year 2014 compared to fiscal year 1995.

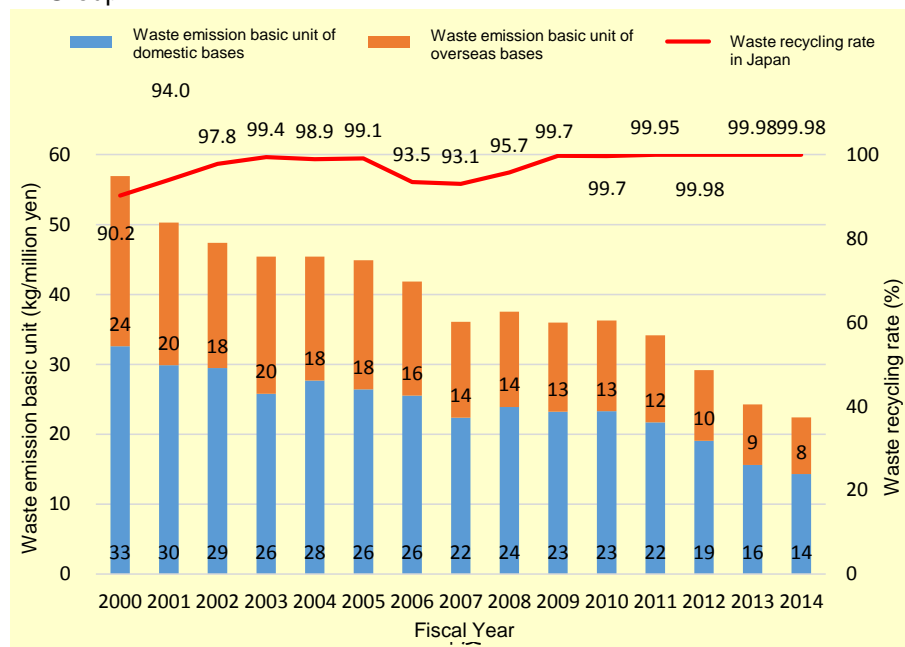

Changes in CO₂ emissions during transportation

Amid growing social concerns about environmental impact reduction in the logistics field, ROHM has been working on the reduction of CO₂ emissions caused by fuel consumption through transportation by road since fiscal year 2004 with measures taken for the transportation of products from production bases, including improvement in loading efficiency and the optimization of delivery frequency by the use of cross-docking. ROHM continued to integrate transport operations and focused on approaches to the reduction of CO₂ emissions, thus achieving the reduction by 14% in fiscal year 2014 compared to fiscal year 2010.

Changes in Emissions of Waste and PFC Gases

Waste emission basic unit (domestic and overseas bases) and recycling rate (domestic bases) of the ROHM Group

Regarding measures to reduce the volume of waste, ROHM Group companies optimize the amount of incoming and secondary materials and strive to increase yield as well as thoroughly separate unneeded materials generated to obtain valuable resources.

In addition, the ROHM Group has defined a waste recycling rate of at least 99% as 'zero emissions.' And after reaching this target at all domestic companies in fiscal year 2009, the group continues to strive towards a true 100% recycling rate (99.98% in fiscal year 2014).

Changes in PFC Gas

What is PFC gas (Perfluorocarbon gas)?

PFC gas is a material essential for fine processing of semiconductors, especially ICs. This PFC gas will turn to a greenhouse gas that produces greenhouse effect 6,500 times as high as CO₂ when it is released into the atmosphere. The semiconductor industry has determined a target for reduction in the PFC gas emissions and promoted the installation of PFC gas treatment systems used to dissolve PFC gases and eliminate the greenhouse effect.

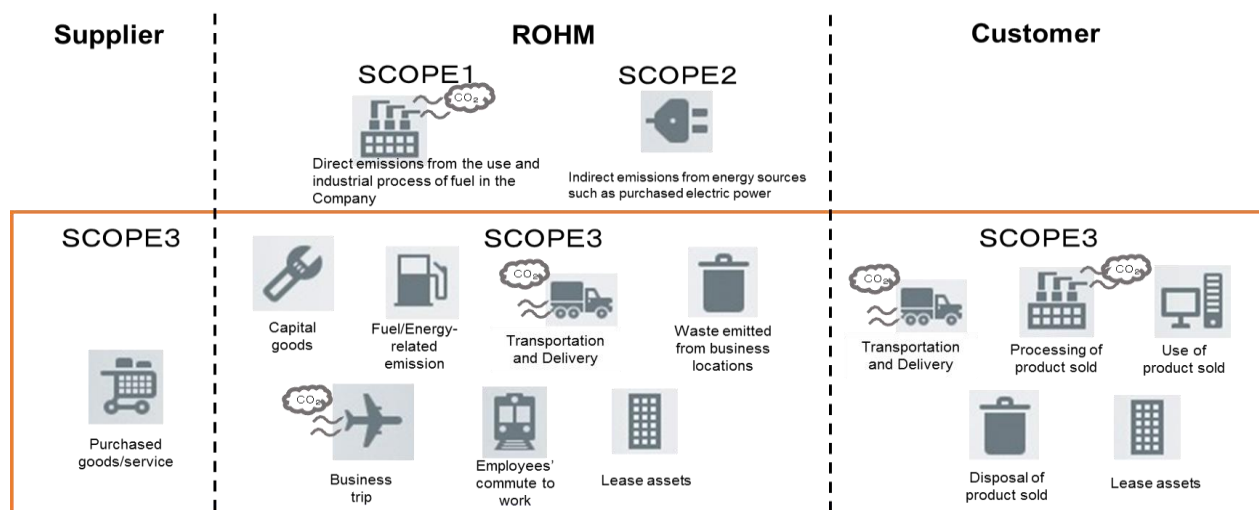

The ROHM Group promoted the installation of PFC gas treatment systems and reduced PFC gas emissions by 64% in fiscal year 2014 compared to fiscal year 1995.

Outline of ROHM's Environmental Conservation Activities

CO₂ Emissions under the Scope3 Standard

Domestic and Overseas Bases

CO₂ emissions from the ROHM Group's business operations in fiscal 2014

Category of Scope Protocol			CO ₂ Emissions (t-CO ₂)	Outline of Calculation	Verification
SCOPE1 (Direct emissions)			52,580	Direct emissions from facilities in the Company's own business locations	○
SCOPE2 (Indirect emissions from energy sources)			520,899	Emissions associated with the production of energy purchased by the Company's business locations	○
SCOPE3 (Emissions from any sources other than Scope1 and Scope2, such as Company's supply chains)	Classification	Category	CO ₂ Emissions (t-CO ₂)	Outline of Calculation	
	Upstream	1 Purchased product/service	383,398	Emissions associated with the manufacturing of purchased product (including material and part)	
	Upstream	2 Capital goods			
	Upstream	3 Fuel- and energy-related activities not included in Scope1 and Scope 2	0	Emissions associated with the procurement of fuel and energy used in the Company's business locations	
	Upstream	4 Transportation and Delivery (Upstream)	35,168	Emissions associated with the distribution of sold product from the Plant → Logistics base → Consumer	○
	Upstream	5 Waste emitted from business operations	353	Emissions associated with the transportation and treatment of waste generated in the Company's business locations	
	Upstream	6 Business trip	1,918	Emissions associated with the business trips of employees	
	Upstream	7 Employers' commute to work	656	Emissions associated with the movement of employees when they commute to the Company to work.	
	Upstream	8 Lease assets (Upstream)	-	Not covered	
	Downstream	9 Transportation and Delivery (Downstream)			
	Downstream	10 Processing of product sold			
	Downstream	11 Use of product sold

Independent Verification of Environmental Data

The ROHM Group received an independent verification of its environmental impact data by Bureau Veritas Japan Co., Ltd. in order to disclose information to society with higher transparency and reliability.

[Scope of Verification]

Scope 1 and 2 12 domestic sites

Scope 3, Category 4: Upstream Transportation and Distribution:

Product transportation between 8 domestic manufacturing sites, 1 domestic logistics center, 6 overseas plants, and 10 overseas sales companies and domestic and overseas customers

**Environmental Performance Data
Independent Verification Report**

To: Rohm Co., Ltd.

May 29, 2015

Bureau Veritas Japan Co., Ltd.
System Certification Services Headquarters

Bureau Veritas Japan Co., Ltd. (Bureau Veritas) has been engaged by Rohm Co., Ltd. (Rohm) to conduct independent verification of its environmental data selected for inclusion in its Environmental Data Book 2015 (the Data Book), issued under the responsibility of Rohm. The aim of the verification is to consider the accuracy of environmental data detailed in the Data Book and to provide a verification opinion based on objective evidence.

1. Verification Outline
Environmental impact data generated through business operations in FY2014 (April 1, 2014 through March 31, 2014)

Scope of Verification	Site Visited	Verification Methodology
Energy use through business operations of Rohm Group's 12 sites within Japan	- Rohm's head office - Rohm Apollo Co., Ltd. - Chikugo Plant - Lapis Semiconductor Miyazaki Co., Ltd.	- Review of documentary evidence produced by Rohm's head office and the sites visited - Interviews with relevant personnel of Rohm's head office and the sites visited - Site inspection and review of data monitoring procedures - Comparison between the reported data and supporting documentary evidence
CO ₂ emissions from energy use through business operations of Rohm Group's 12 sites within Japan		
Category 4 of Scope 3 GHG emissions accounted in line with the GHG Protocol's 'Corporate Value Chain (Scope 3) Accounting and Reporting Standard'	- Rohm's head office	- Review of documentary evidence produced by Rohm's head office - Interviews with relevant personnel of Rohm's head office - Comparison between the reported data and supporting documentary evidence

This verification was conducted using Bureau Veritas' standard procedures and guidelines for external verification of non-financial reporting, based on current best practice. Bureau Veritas refers to the International Standard on Assurance Engagements (ISAE) 3000 in providing a limited assurance for the scope of work stated herein.

2. Findings
Environmental impact data generated through business operations in FY2014
Based on the verification work and process followed:
- the environmental impact data stated in the Data Book is consistent with the data collected and consolidated by Rohm's Head Office;
- there is no evidence to suggest that environmental impact data reported by the sites visited to Rohm's Head Office are not free from significant error.

Bureau Veritas has implemented a code of ethics across its business which is intended to ensure that all our staff maintain high standards in their day to day business activities. We are particularly vigilant in the prevention of conflicts of interest. Bureau Veritas activities for Rohm are for sustainability reporting verification only and we believe our verification assignment did not raise any conflicts of interest.

Environmental Performance Data Independent Verification Report

GREENHOUSE GAS EMISSIONS VERIFICATION STATEMENT

To: Rohm Co., Ltd.

May 29, 2015

Bureau Veritas Japan Co., Ltd.
System Certification Services Headquarters

Bureau Veritas Japan Co., Ltd. (Bureau Veritas) was engaged by Rohm Co., Ltd. (Rohm) to conduct verification of the greenhouse gas (GHG) emissions for FY 2014 reported in its Environmental Data Book 2015.

1. Scope of Verification
Rohm requested Bureau Veritas to verify, to a limited level of assurance, the accuracy of the following GHG information:
1) Scope 1 and Scope 2 GHG emissions:
CO₂ emissions from energy use through business operations of Rohm Group's 12 sites within Japan for the period of April 1, 2014 through March 31, 2015.
2) Scope 3 GHG emissions accounted and reported in line with the GHG Protocol's 'Corporate Value Chain (Scope 3) Accounting and Reporting Standard'.
Category 4 – the emissions from transportation of products sold by Rohm Group for the period of April 1, 2014 through March 31, 2015.
However, the data for the period of April 1, 2013 through March 31, 2014 is partly used in the calculation.

2. Methodology
Bureau Veritas conducted the verification in accordance with the requirements of the international standard 'ISO 14004-3:2009: Greenhouse gases - Part 3: Specification with guidance for the validation and verification of greenhouse gas assertions'.
As part of Bureau Veritas' assurance, the following activities were undertaken:
- Interviews with relevant personnel of Rohm responsible for the identification and calculation of GHG emissions;
- Review of Rohm's information systems and methodology for collection, aggregation, analysis and review of information used to determine GHG emissions; and
- Audit of a sample of source data to check accuracy of quantified GHG emissions.

3. Conclusion
Based on the verification work and processes followed, there is no evidence to suggest that the GHG emissions assertions shown below:
- are not materially correct and are not a fair representation of the GHG emissions, as per the scope of work;
- are not prepared in accordance with the methodology for calculating GHG emissions established and implemented by Rohm.

Verified greenhouse gas emissions		
Scope 1	Scope 2	Scope 3
33,763 t-CO ₂ e	290,652 t-CO ₂ e	35,168 t-CO ₂ e

[Statement of independence, impartiality and competence]
Bureau Veritas is an independent professional services company that specializes in Quality, Health, Safety, Social and Environmental management with over 150 years history in providing independent assurance services. No member of the verification team has a business relationship with Rohm, its Directors or Managers beyond that required of this assignment. We conducted this verification independently and to our knowledge there has been no conflict of interest. Bureau Veritas has implemented a Code of Ethics across the business to maintain high ethical standards among staff in their day-to-day business activities. The verification team has extensive experience in conducting assurance over environmental, social, ethical and health and safety information, systems and processes, has an excellent understanding of Bureau Veritas standard methodology for the verification of greenhouse gas emissions data.

Greenhouse Gas Emissions Verification Report

[Comment of Verifier]

Through the verification of the states of tabulating data in the 12 domestic sites and Head Office, It was confirmed that the mechanism of reporting to Head Office numerical values calculated according to the procedure functioned with certainty in all the foregoing sites and tabulated data with high reliability through automatic calculations.

The effect of these activities is expected to spread throughout the entire ROHM Group.

Social contribution through products

Donating LED bulbs for the Kyoto Lantern Festival

All of the lights used in the paper-covered lanterns and signpost lanterns at the Kyoto Lantern Festival were LED lamps donated by ROHM. Amid the demand for increased power savings throughout the country, issues were raised about holding the festival due to energy conservation and eco-friendliness.

However, the use of ROHM's high-efficiency LED lights, the amount of power consumed by the lanterns was cut to roughly 1/6th. Twice a year, in March and December, ROHM's LED lights brighten the Kyoto night.

Environment-related Posters Contest during Environment Month

The ROHM Group Companies take June each year in which the World Environment Day is set as the Environment Month to encourage the submission of environment-related posters and slogans and hold the contest of them during the period. The number of entries increases each year and that of posters and slogans that seriously take the global environment increases as well.

Approaches in “Environmental Education”

ROHM Group’s “Environmental Education at Elementary Schools”

The ROHM Group visits neighboring elementary schools to provide environmental education for the students. In the schools, we gave the students classes with themes like creating circuits by combining ROHM's various eco components, thinking together about what they can do to save power and enhancing their environmental awareness.

環境表彰

ROHM received a commendation for reduction of Greenhouse gas emissions from Kyoto City

State of the award ceremony

On December 19, 2014, ROHM received a commendation as a company that actively worked on and achieved outstanding results in greenhouse gas emissions reduction activities during the period of 2011 to 2013.

ROHM will continue to strive for environmental impact reduction and also work on environmental conservation activities throughout the ROHM Group.

RIST received the Certification of Level 3 Green System from the Ministry of Industry of

State of the award ceremony

On July 16, 2014, RIST received "The Green Industry Certification: Level 3 Green System" from the Ministry of Industry of Thailand for continual environmental improvements and environmentally friendly business operation.

RIST will conduct further activities aiming to receive the Certification: Level 4 Green Culture in this fiscal year.

RSC received the Environmental Excellence Company Award

State of the award ceremony

On June 5, 2014, RSC received the "Environmental Excellence Company Award" in Tianjin Economic-Technological Development Area, China.

The Environmental Excellence Company Award is given to companies that achieved excellent activities for environmental impact reduction. RSC won this Award for three consecutive years.

RSC has been working on the replacement of ferric chloride that is a chemical substance subjected to the PRTR system. RSC will conduct further activities in fiscal 2015 aiming to complete the replacement.

Site Reports (Domestic and Overseas Bases)

ROHM Co., Ltd. 21 Saiin Mizosaki-cho, Ukyo-ku, Kyoto 615-8585, Japan

■Manufacturing items:
Electronic parts, including
semiconductors

		2012	2013	2014
Power consumption	kWh	86,937,000	77,167,000	78,805,000
Fuel consumption	kl	1,419	1,012	1,091
Water consumption	1,000 m ³	784	750	607
Total waste emissions	t	502	394	456
Amount of waste finally disposed of as landfill	t	0.04	0.00	0.00
Waste recycling rate	%	99.99	100.00	100.00
Emissions into the atmosphere: NOx	t	1.5	1.1	3.3
Emissions into waters: BOD	t	6.1	5.0	2.1
